3. Our estates' quality

The Company's business model is based on the fact that during each lease term and until the repayment of all the lease contributions payable, the land which purchase has been financed remains the property of the Company. In this way, the land itself serves as collateral for discharging lessees' obligations under leases and as a guarantee for our shareholders' investments. Having in mind this, we precisely select the estates, which we buy in execution of leasing contracts. They are mainly estates with sustainable use: farm fields or cultivated area and they are the most liquid ones on the agricultural market.

The Company finances single projects for development of vineyards and other permanent crops as well.

The following table presents all the estates financed by now showing the quality of land by its sustainable use and category.
